

Connecting to the Internet through QFLink

1. If you are connecting wirelessly, make sure wireless is turned on. Connect to the TAMUQ wireless network. The following process also applies to a wired network connection.
2. Once you have connected the network (wired or wireless), open your browser and try to access any web page. You will be automatically forwarded to the page below (Figure 1):

QFLink

Welcome to the *QFLink* wireless Internet Service. To access the Internet please perform one of the following steps:

TAMUQ Faculty, Staff, and Students

Please authenticate using your TAMUQ username and password. Once your information is validated you will be granted access to the TAMUQ portion of the building's local area network (LAN).

Guests

Guests should register by entering your email address. You will be provided with access to the guest portion of the building's local area network (LAN). You will be able to use most Internet applications including your web browser, email client, and instant messaging software.

Notice

To avoid getting a security error you may need to download the CA Certificate. Click the "Install CA Certificate" button on the left side of the page. Select "Open" to download the certificate. Then select "Install Certificate" and click "Next", "Next", and "Finish". After you click on "Finish" you will be asked, "Do you want to ADD the following certificate to the Root Store?" Click "Yes". The CA Certificate will be installed.

If you have any questions please email helpdesk@qatar.tamu.edu for assistance.

INFORMATION TECHNOLOGY SERVICES

Figure 1

3. Type your **email address** in the grey text box area in the top left corner of the page and click **Log in**. You now have access to the internet.

Note: If you were not automatically forwarded to this page then try the following:

- a. In Internet Explorer, go to Tools > Internet Options and click on Delete History, Delete Cookies and Delete Temporary File (make sure Clear Offline Content is checked).
- b. If you using a wired connection, go to Tools > Internet Options> Connections tab > Click on LAN settings> Make sure the boxes under Automatic Configurations and Proxy Server are all **Unchecked**.
- c. Click Ok then restart Internet Explorer.
