

Dyknow

Configuration of Communication Settings

To be able to connect to the TAMUQ Dyknow server the communication settings of the Dyknow client on your computer have to be configured correctly. This tutorial guides you through the necessary steps to connect to the Dyknow server and use Dyknow at TAMUQ.

- Open the Dyknow client on your computer and the login screen will appear (Figure 1).
- Click on the “Communications Settings” link (Figure 1).

- Change the *Communication String* to **dyknow://dyknow.qatar.tamu.edu** (Figure 2 Step 1).
- Click on the *Test* button (see Figure 2 Step2) and the message “Communication Test successful” will appear. This verifies the functioning connection to the Dyknow server.
- Click the *OK* button (Figure 2 Step 3).
